

Jireh Token

The Whitepaper

What is Jireh? Jireh is mentioned in Genesis as Jehovah Jireh, meaning God will provide. We take Jireh as meaning to provide. We will provide for widows and widowers on fixed incomes.

What is JirehToken? The token is the means to help accomplish our vision. As you buy and sell Jireh tokens, a small portion will go to the fund as explained in this whitepaper to provide necessary expenses to operate and provide funding for widows.

The Charity Plan

Our intent is to help those who actually need the help. Strict qualification guidelines will be in place to ensure the widows who need our help are the ones getting it.

Some individuals are forced to make a choice to pay their rent or getting needed medications and go without one or the other, if not both, far too often. These people on fixed incomes simply want a decent home to call their own and be able to live a life filled with dignity.

With your help, we can literally do a world of good!

THE TOKEN

Jireh Token is released under the BSC blockchain initially available on Pancake Swap. Why a BSC token? ETH fees are far too high. We want our token available to those with smaller budgets and this blockchain, along with very low gas fees make it possible.

The tokenomics are listed below with an emphasis on both redistribution and increasingly lowering the overall supply by burning tokens through our utility. With our unique tokenomics, this token

should steadily increase in value overall. There will always be dips, but with our plan as noted above, along with our buy back and burn, there should be steadily higher lows with each dip. We will work to stabilize the floor of this token as much as possible.

Every token (other than those that get burned) will be available as none are being initially deployed to any wallets for any service or favor. Even members of the development team will have to buy their own tokens and trade those tokens like everyone else.

This contract was audited by Solidity Finance who have completed well over 1300 audits to date.

The contract has been renounced and no changes can be made. We will never make any changes and we vow to never initiate a V2 of Jireh Token.

Burning tokens will come from funds raised by purchasing rental properties. A portion of lease and rental payments will go directly to buy and burn tokens. The more properties we acquire, the more burn we will produce each month. We will burn a minimum of 1 million

tokens per month initially and then continue to add to the burn. The formulation for funding the burn will be the rent on all properties calculated each month. 25% of the rent goes to our overhead.

The other 75% of rents will be broken down as follows.

40% goes to our widow fund to continue the charitable mission

30% goes to our property investment fund to acquire new properties

10% goes toward taxes and insurance

10% goes toward maintenance and upkeep costs

10% goes to our burn fund where we will buy and burn tokens each month.

This process for the buy and burn helps you in two ways. First, when we use the funds to purchase the tokens to burn, you will receive the reflections on that purchase. Immediately after purchasing these tokens, they will be sent to the burn wallet. Again, adding to your reflections and the burn total increases.

The Dev Team

No project can succeed without a dedicated team behind it. From social media to promotions and all the way to the ones who will be in charge of working with widows, a good, honest, hardworking team is a requirement. We believe we have excelled at selecting a more than qualified group of people who are ready to tackle every aspect of this project. Each one brings a special talent to this project and their true friendship is more than anyone could ask for.

Andy Woolard

COO

A born entrepreneur and tireless worker. Andy owns his own business and also works as a fraud analyst for a global company. It is his dream to help as many people as possible.

Roeland

Promotions/Social Media

Hailing from the great state of Alabama, Roeland is a computer guru who will be in charge of our social media. His recent success in crypto will surely help him promote Jireh.

Kevin M.

Project Manager

An eye for detail and approaching things with both analytical prowess and common sense which is a lost art today. Kevin is the voiceover guy who does Kermit better than Kermit!

Roy

Construction Manager

Roy will be handling all the real world building, reconstruction and remodeling efforts to help the widows and our rental properties. His carpentry talents will surely come in handy very soon.

Walker

Business Manager

Walker is currently working on his degree in business and will be a welcome addition to the Jireh team as he will be responsible for the daily chore of maintaining the charity side.

Other perks for holders!

Each month the marketing wallet gains 2% of all buys and sells of Jireh Token in BSC. Each month a holder has held tokens throughout the previous month without having any sells of Jireh Token, they will be eligible for the bonus prize drawing.

We will take 10% of the funds added to the marketing wallet for that month and distribute those funds to 5 of those holders in a random drawing. This could potentially be worth thousands of dollars. It is all dependent on the volume.

Possible Bonus!

The trust behind this token has already invested and will continue to invest in a number of other tokens. The current tokens can be seen on

our web site. Once these tokens generate a return and gets cashed out, a majority of the funds from those tokens will be used to aid in the purchase of rental properties, which will result in a higher amount being added to the burn fund. More details on this as we use the funds.

We will remain open and transparent in everything we do.

We are here to stay and will continue our efforts to help others as we work to build the value of Jireh Token.

Our success depends on YOU!

You need to let others know about us on any social network you belong to. Spread the word and let others know they can make money with Jireh Token while helping the most vulnerable among us.
